Proficy Historian CSV file

A component to automatically convert text data files to Proficy Historian import files. The component is being used in association with Proficy Historian and its File Collector. Several equipments and file formats can be handled at the same time with the same NovotekFileCollect-Converter.

Interpret the files and transform the data into Proficy Historian text file format

- ⌘ **WORKS CONTINUOUSLY** and transforms the files automatically.
- ⌘ **CONFIGURES THE FILE FORMATS** without programming.
- ⌘ **VERY FLEXIBLE CONFIGURATION TOOLS** handles most file formats.
- ⌘ **THE COMPONENT** can be ran on a separate computer or on the Proficy Historian server.
- ⌘ **INCLUDES DEBUGGING TOOLS** that traces conversions in debugging window or file.
- ⌘ **HANDLES SEVERAL INDATA FILE FORMATS AT THE SAME TIME.**

NOVOTEK *FileCollectConverter*

FACTS

NovotekFileCollectConverter helps you to make your production more efficiency since you don't have to use lots of unnecessary custom made programs in order to receive the text files into Proficy Historian.

Novotek AB is an independent enterprise specializing in advanced products and open integrated solutions for automation in all lines of business. We supply conceptual proposals, consulting, R&D, support and training with the FIX family of products as base

A SIMPLE CONFIGURATION

Indata to the component are text data files, which can be in different formats. The component is configured to interpret the files and transform the data into Proficy Historian text file format. These files are then automatically imported into Proficy Historian by the File Collector.

HIGH FLEXIBILITY

Several industrial systems can report text files with relevant data for the machine, for example the time for a finished batch including a number of batch parameters, logging of all parameters in a system at a given time, etc. The data format of these files is often one's own invention of format. To get these files into Proficy Historian in an easy way, Novotek has developed this component, which with its high flexibility prevents the need of writing special programs.
